

# DMP-012-V/1-FR1

## SPD - for data, signalling and telecommunications lines / I&C / Supply (DP and DMP) - with signalling line

Combination of surge protections for signal and supply lines

pluggable module, coupling impedance ( $R$  – resistance) in part of data, line separated from protective earth via GDT

- combination of two-stage surge protection of 2-core signalling line in data part and surge protection for ELV in supply part
- installation close to protected equipment
- for protection of interfaces of I&C, electronic security and fire detection systems, etc., mainly for measuring circuits and sensors where signal and supply are transmitted in one cable, against surge voltage
